PRESS RELEASE

UNITED WATER BEGINS HYDRANT FLUSHING PROGRAM

Maintenance effort will improve water quality

City of Rahway, NJ, April 13, 2015 – United Water will flush hydrants throughout Rahway beginning the week of April 13, 2015. Crews will work Monday through Friday between 9:00 p.m. and 1:00 a.m. to minimize customer inconvenience. The flushing program is expected to last for about six weeks.

Flushing removes harmless minerals that collect in the water mains. The project is part of the company's routine maintenance program to assure high water quality. Flushing hydrants helps to maintain the integrity of the distribution system by keeping the water lines clean. It is also necessary for fire protection because flushing ensures that the hydrants are working properly.

During the flushing process, customers may experience low water pressure or discolored water. While the water is safe to drink, customers may prefer to wait until it runs clear before drinking or washing clothes or dishes.

Customers with questions or problems can call United Water's customer service center at 1-877-303-2435. Customers interested in learning more about the company can visit the website at www.unitedwater.com/rahway.

About United Water

United Water provides water services to 26,500 people in Rahway through a public-private partnership. United Water is one of the nation's leading environmental companies, providing water and wastewater services to over 5.3 million people in the United States. In addition to owning and operating 16 water and wastewater utilities, United Water operates 84 municipal and industrial water and wastewater systems through innovative public-private partnerships and contract agreements. Founded in 1869, United Water is a subsidiary of SUEZ ENVIRONNEMENT.
